- S** Starting from Grosmont Community Hub (with the building behind you), head L before quickly turning R onto the right of way (before Rock Villa house). Follow the alleyway between the houses and take the gate leading to Grosmont Castle. Going slightly L will lead you to a metal field gate (stile adjacent). Either pass through the gate or climb the stile and follow the path through the field with the fence on your R hand side. When you see a metal field gate ahead of you, turn L where you will see a waymarked gate.
- 1** Exit the field here onto to the road. Being careful of the road, turn R and continue until you come to Grosmont Bridge over the River Monnow. On your L will be a stile (with fingerpost) leading into a field. Enter this field and follow the boundary on the R hand side. As you follow along the boundary you will see a stile on your R hand side. Passing over this stile into the next field, go straight and follow the boundary on the L till you come across another stile ahead of you.
- 2** Heading over the stile into the next field, keep the boundary on your L and follow the path. You will come across another stile to pass over, still keeping the boundary on your L. Eventually you will see a footbridge on your L. Passing over the stream, there will instantly be a stile leading into the next field.
- 3** Follow the waymarking on the stile and head straight uphill. When you pass over the crest of the hill (walking by some smaller trees), you will see houses on your L and R. Turning to the R, head for the middle of these houses where you will find a stile. Over this stile and through the alleyway between the houses, you will come to the road that you walked earlier. Heading R here will take you back to the starting point.
