

## Paths to Wellbeing Microsite ReadMe

(GitHub Repository - Backend)

### Overview

The Paths to Wellbeing microsite is generated via a GitHub repository containing all static and dynamic data. Below are listed directories for the static content where potential changes could be made by contributors only. It is highly recommended to not alter anything else within this repository.

**IMPORTANT** → This repository contains the following coding languages and as such contributors should have a minimum basic understanding of these.

- JavaScript
- CSS
- Svelte
- Nunjucks
- HTML

The repository has 2 branches associated with it (main and prod). The “main” branch is a separate branch used for development purposes and “prod” is the branch for the official URL ([pathstowellbeing.ramblers.org.uk](https://pathstowellbeing.ramblers.org.uk)). Changes need to be made to the “main” branch first, confirmed via the development link then pulled across to the “prod” branch when ready (process detailed in “Editing” below).

### Key Contacts

Ali Linden (Astun Technology, Project Manager)

Joe Marshall-Mills (Ramblers Cymru, Monitoring Officer)

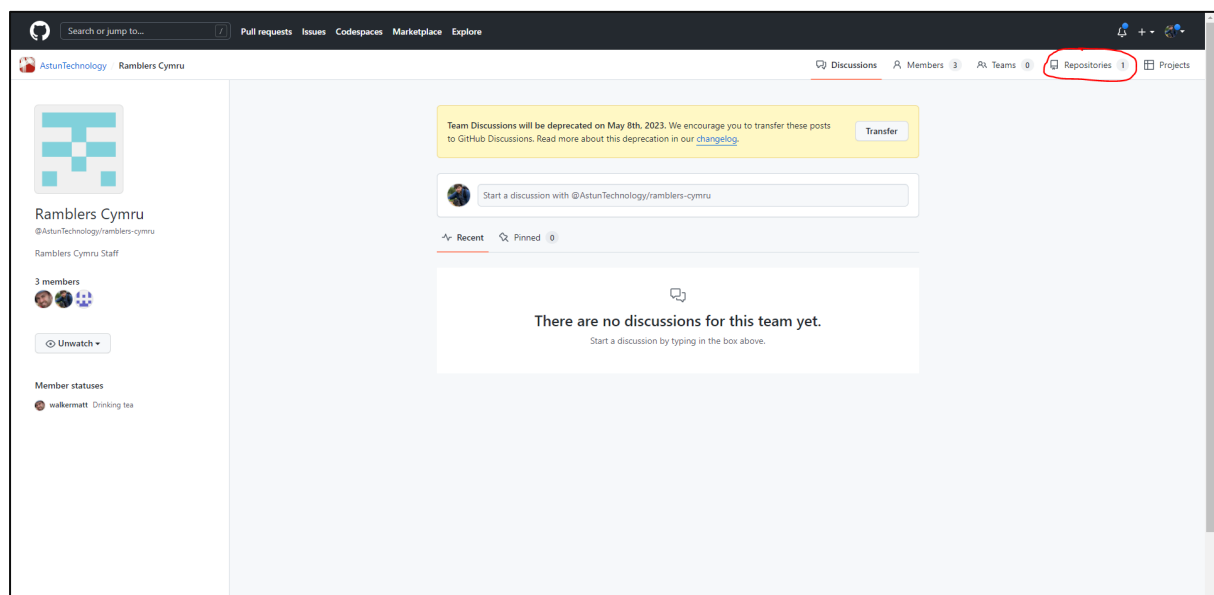

- o [joe.marshall-mills@ramblers.org.uk](mailto:joe.marshall-mills@ramblers.org.uk) | [joe.marshallmills@gmail.com](mailto:joe.marshallmills@gmail.com)

## Logging in

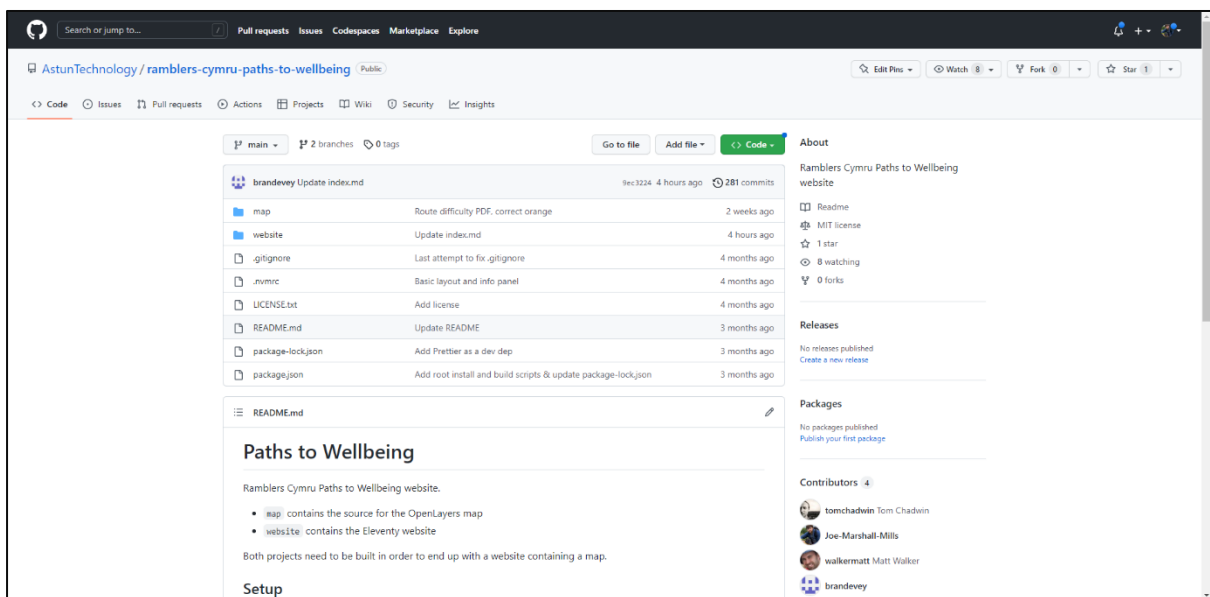

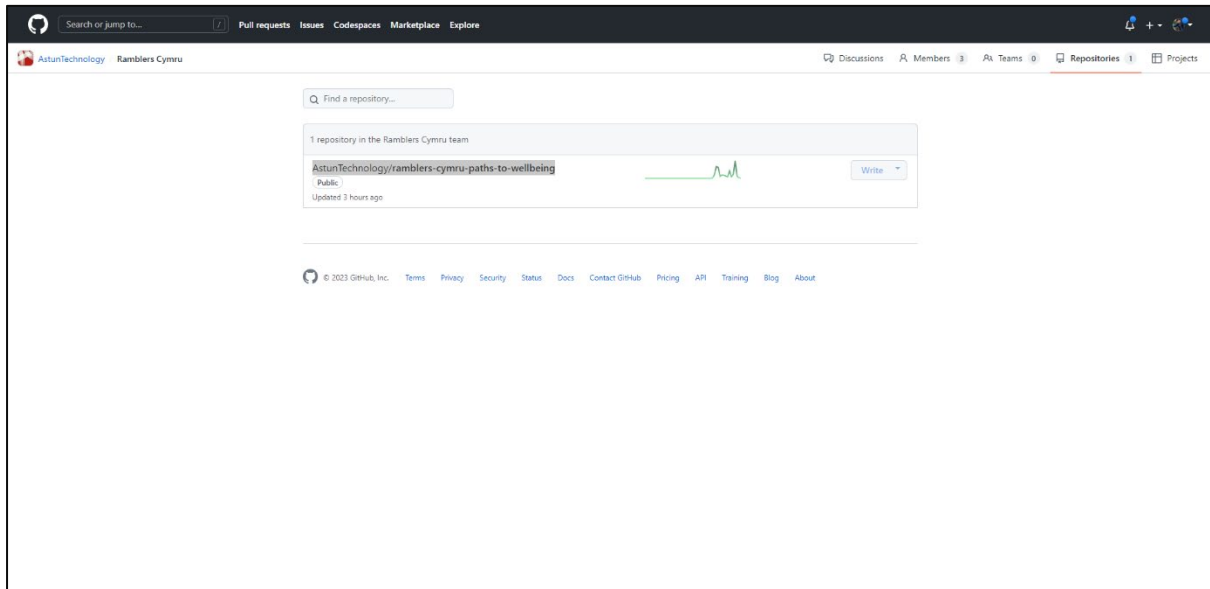

As a contributor, you will be sent an email giving you access to this repository. The link within that email should take you directly to the home page for Ramblers Cymru.

From here pressing “Repositories” to take you to a page containing the “AstunTechnology/[ramblers-cymru-paths-to-wellbeing](https://github.com/orgs/AstunTechnology/teams/ramblers-cymru)” repository link.

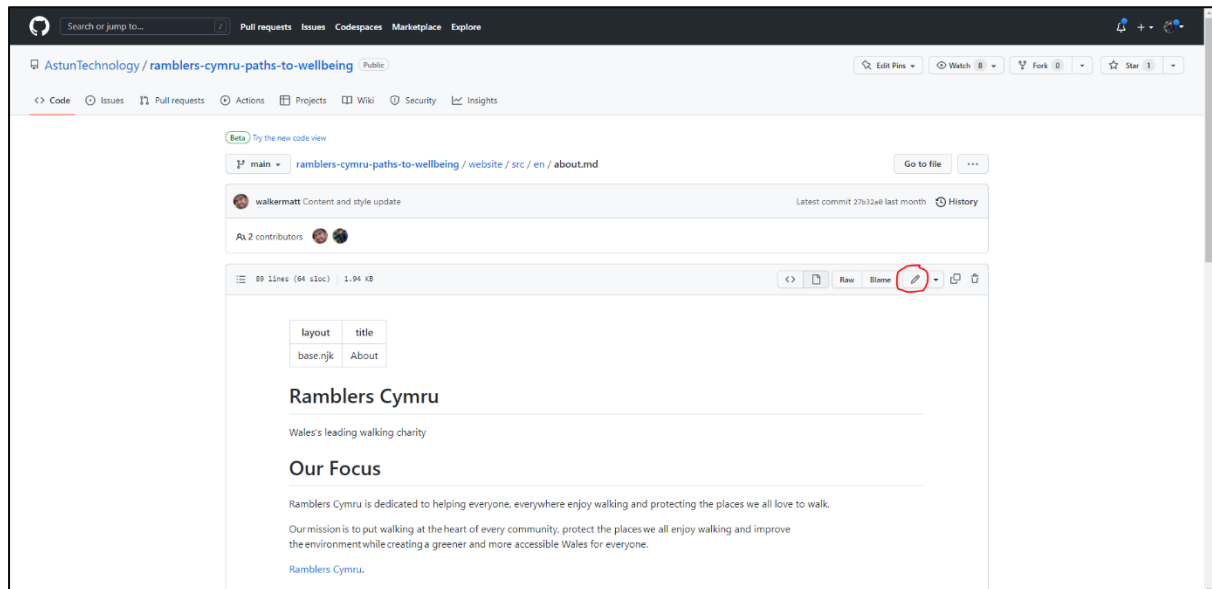

Clicking this link will take you to the home page of the repository.

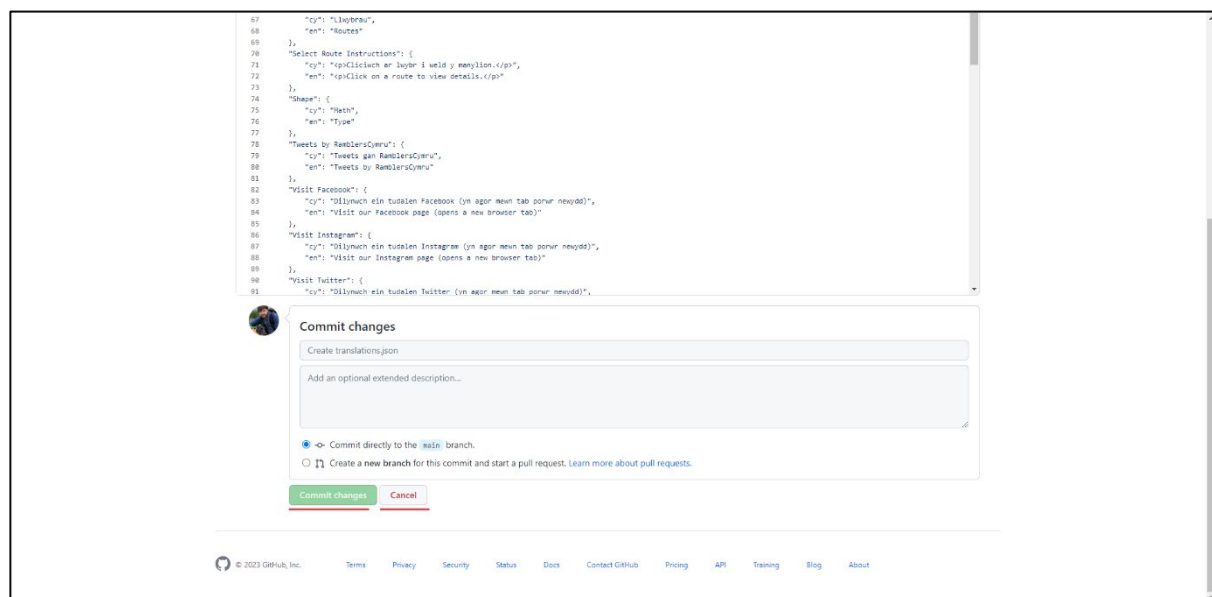

## Editing

Before starting, ensure you are on the “main” branch of the repository. Then, to edit any of the below files click the pencil (“edit this file”) icon in the top right of the toolbar, once you are in the file. A basic understand of the relevant code will be needed to then navigate and make changes.

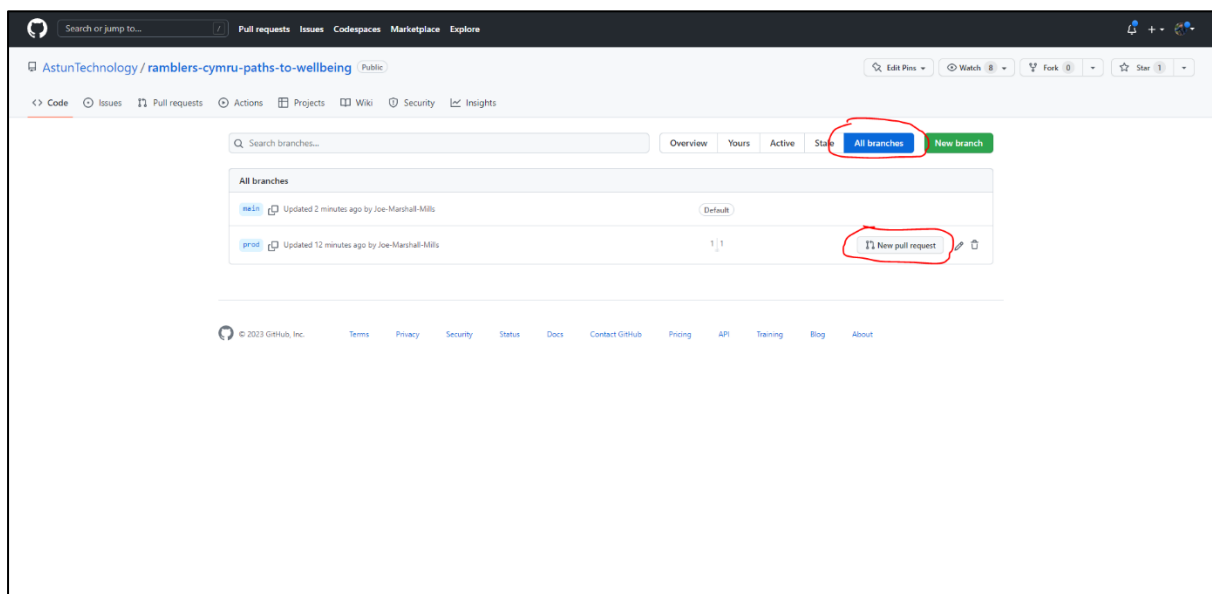

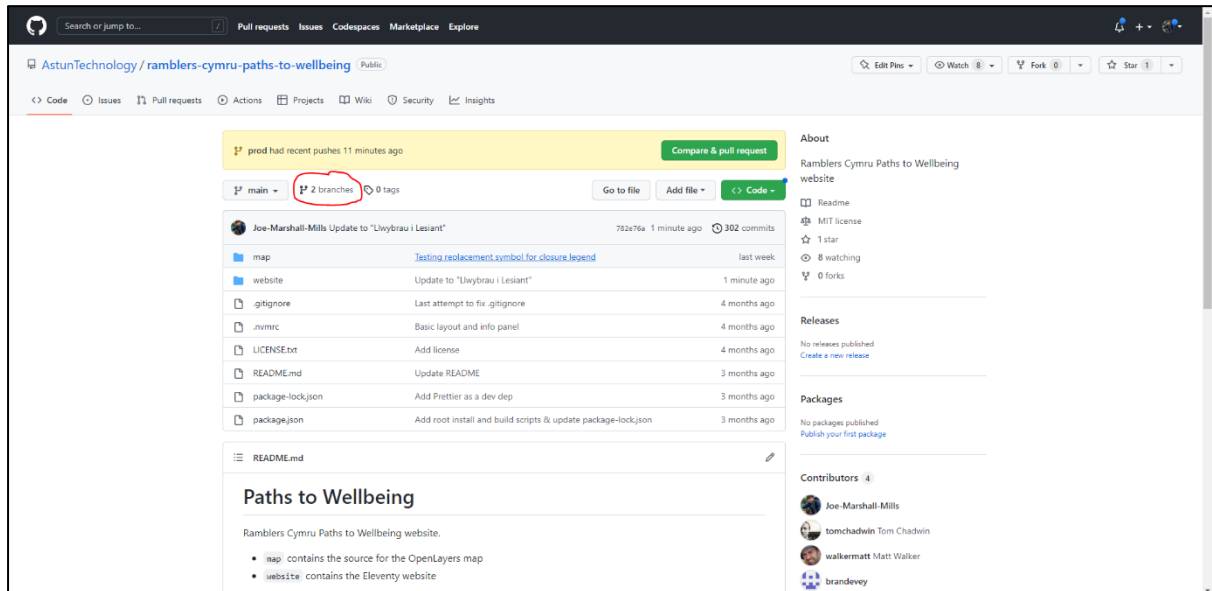

Pressing “Commit changes” at the bottom of the page will confirm the changes made, otherwise “Cancel” or “Cancel changes” will not save any changes made and return to the original state before you started.

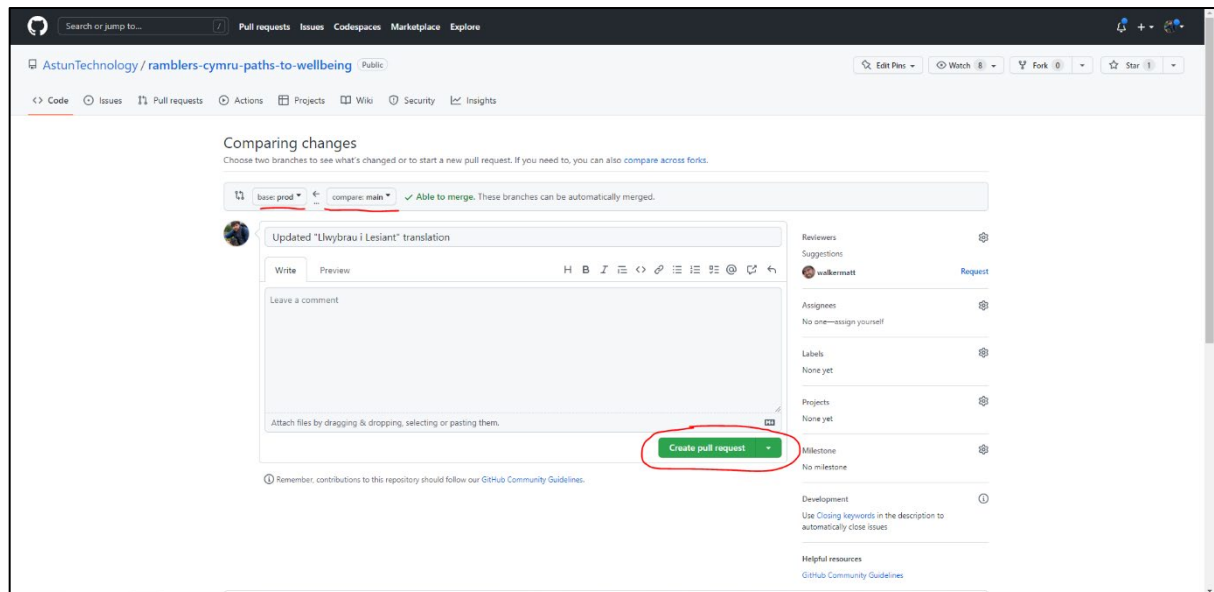

You will now need to wait (around 10 mins) and confirm your changes on the development link available from the home page of this repository before moving on with the next step and committing/ pulling the changes across to the official site.

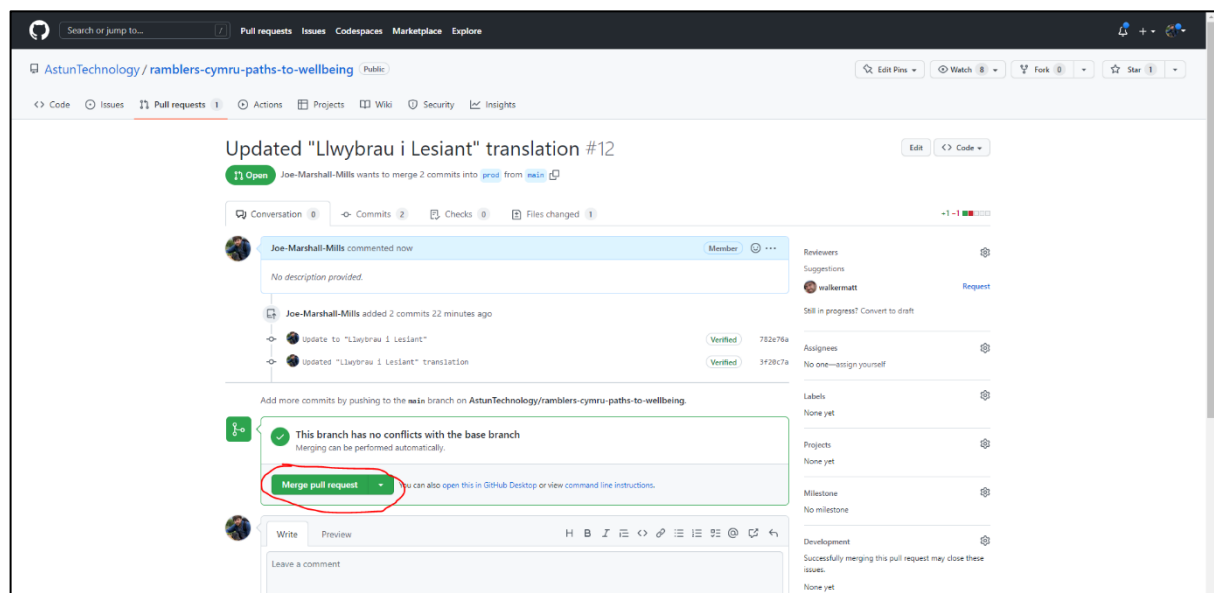

Once your change(s) has been confirmed on the development site you need to press the “2 branches” button. Then move over to the “All branches” section of this page. After this you can perform a “New pull request”.

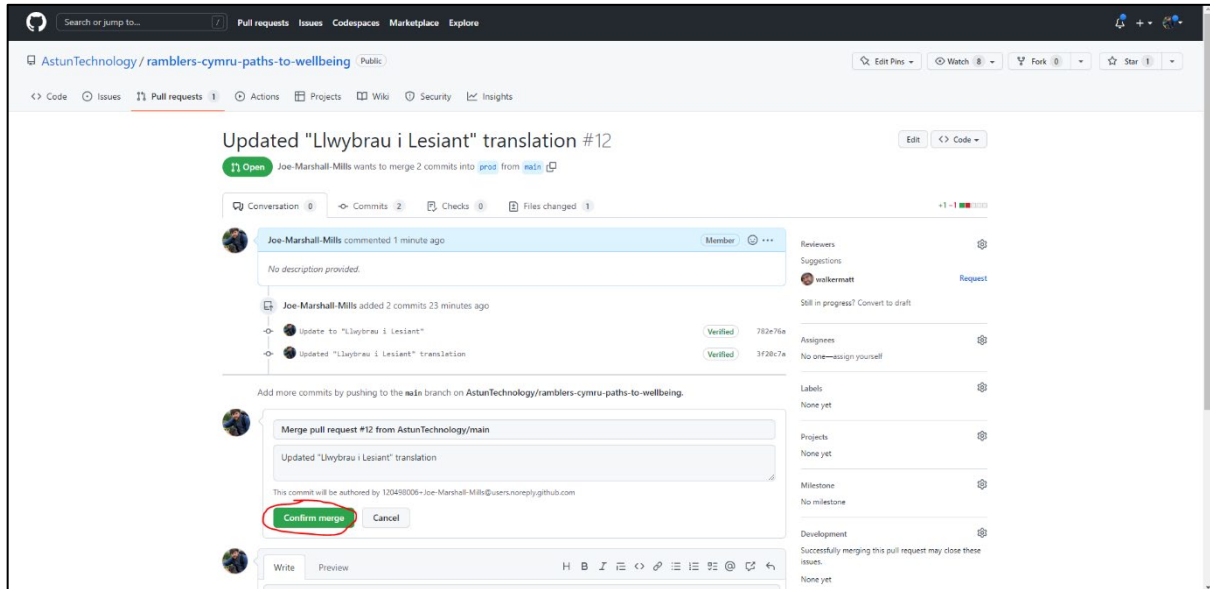

On the next page you will need to confirm that in the toolbar “prod” is in the left hand box with “main” in the right (pointing to “prod”). You may need to add some text to the title box (e.g. Updated “Llwybrau i Lesiant” translation) to then be able to press the “Create pull request” button.

The next page there will be a button available called “Merge pull request”, pressing this will change that button to “Commit merge”. Once both of these are pressed the changes made on the “main” branch will merge across to the “prod” branch and after about 10 mins the official site will also be changed.

The screenshot shows a GitHub pull request interface. At the top, the repository is identified as `AstunTechnology / ramblers-cymru-paths-to-wellbeing`. The pull request title is "Updated 'Llwybrau i Lesiant' translation #12". The status is "Open". The pull request was created by `Joe-Marshall-Mills` and wants to merge 2 commits into the `prod` branch from the `main` branch.

The commit history shows two commits by `Joe-Marshall-Mills`:

- Update to "Llwybrau i Lesiant" (Verified, 782e76a)
- Updated "Llwybrau i Lesiant" translation (Verified, 3f28c7a)

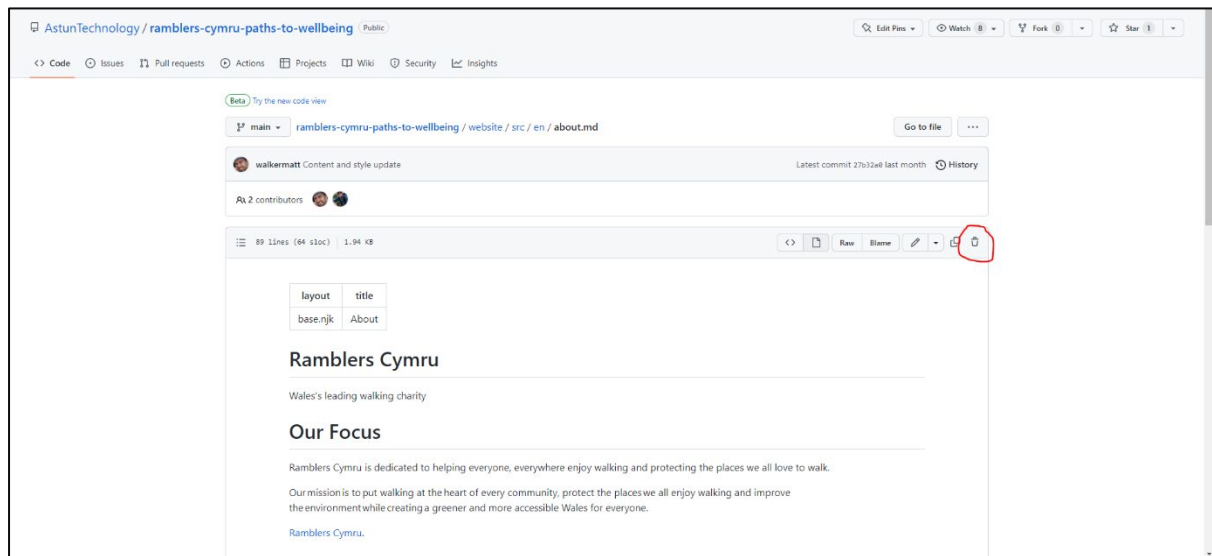

The pull request description includes a merge summary: "Merge pull request #12 from AstunTechnology/main" and "Updated 'Llwybrau i Lesiant' translation". Below this, there is a green "Confirm merge" button and a "Cancel" button. The "Confirm merge" button is highlighted with a red circle.

On the right side, there are sections for "Reviews" (with a suggestion from `walkermatt`), "Assignees" (none assigned), "Labels" (none), "Projects" (none), "Milestone" (none), and "Development" (none).

## Accidental Deletion

Under any circumstances DO NOT press the bin icon (“Delete this file”). If this does occur then see this link here on restoring deleted repositories or contact Astun Technologies.

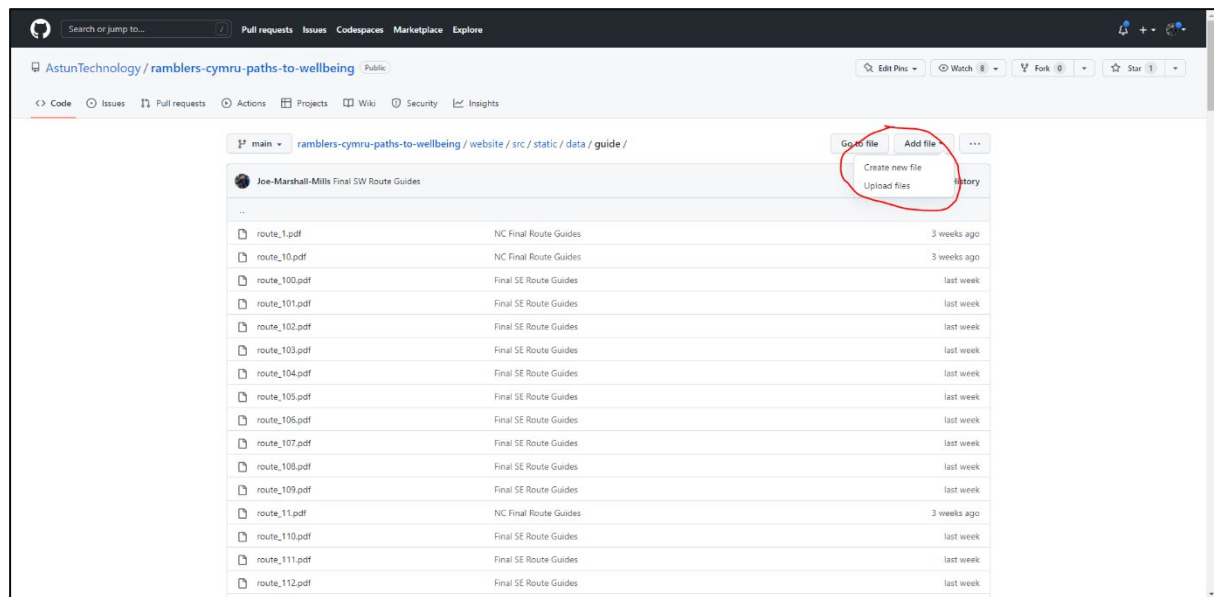

<https://docs.github.com/en/repositories/creating-and-managing-repositories/restoring-a-deleted-repository>

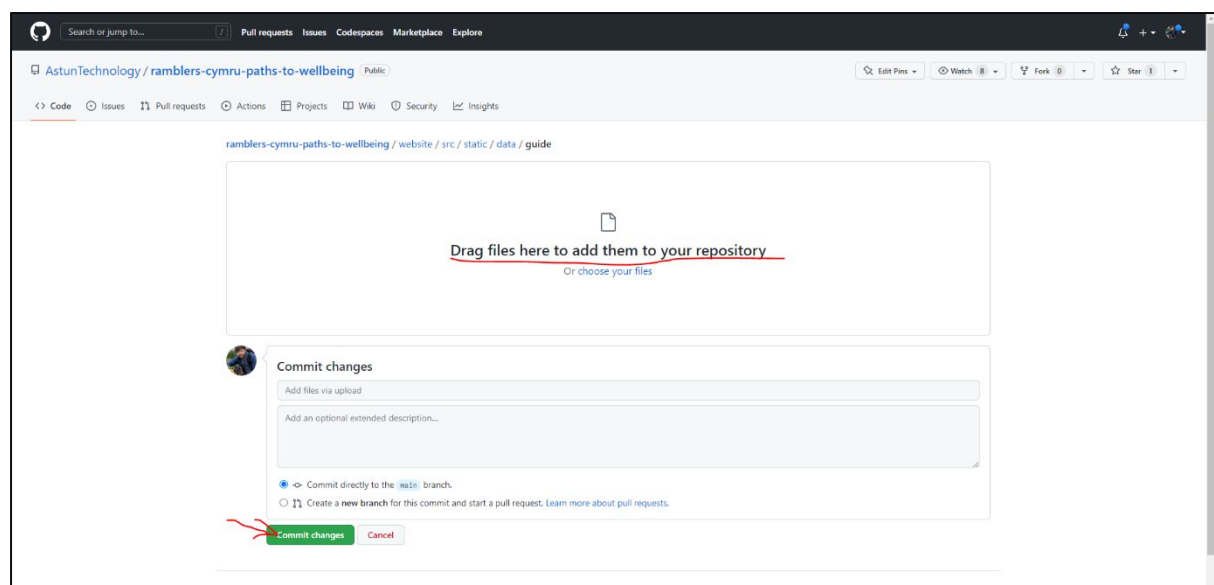

## Replacing PDFs/ Images

As stated below, any files denoted by a \* indicates file names that cannot be changed. Failure to do this will create redundant files that will not be present on the website. To replace a file in one of these folders, press “Add file”, then “Upload files”.

You will be able to then drag and drop the correctly named file here. Once uploaded, you will be able to “Commit changes” replacing the old file.

## **Static Content Directories | \* (FILE NAMES NOT TO BE CHANGED - SEE ABOVE)**

<ramblers-cymru-paths-to-wellbeing/website/src/>

- index.md (landing page with choice between Cymraeg and English)

[ramblers-cymru-paths-to-wellbeing/website/src/\(en/cy\)](ramblers-cymru-paths-to-wellbeing/website/src/(en/cy))

- about.md
- contact.md
- index.md (home page)

[ramblers-cymru-paths-to-wellbeing/website/src/\\_data/translations.json](ramblers-cymru-paths-to-wellbeing/website/src/_data/translations.json)

- Lists all translations for text within website

<ramblers-cymru-paths-to-wellbeing/website/src/static/img/>

- Houses all static page imagery. Uploading files with same names will replace the old. \*
- Image size will need be adjusted dependant on use (i.e “\_Header” images are 1200px wide).
